

## **Bachelor and Master Theses at Chair Nyborg**

Please follow the procedure pointed out on <http://www.bf.uzh.ch/cms/de/studium/schriftliche-arbeiten.html> if you would like to apply for writing your bachelor or master thesis at Prof. Dr. Kjell G. Nyborg's Chair.

The professor and his PhD students are particularly interested to supervise topics in the research areas listed below. Please send us your research proposal (together with the other application files; see link above) if you think your research question falls into one of the listed research areas. However, have in mind that having a research proposal in one of these areas is not a sufficient criterion that you can write your thesis with us because we have a limited capacity to supervise theses.

We expect students to write their bachelor or master thesis in English. Hence, please submit your research proposal also in English.

We do not provide project definitions before a student applies with an own research proposal, preferably with focus on one or a combination of the research fields listed below.

### **Research areas/fields for bachelor and master theses:**
